

# ANFP® SURVEY SAYS...

ANFP conducted surveys in October 2020 and January 2021 delving into the effects COVID-19 has had and continues to have on ANFP members' work environment. Three data points from the surveys are provided below.

To see the full survey results for each setting, as well as for the healthcare foodservice segment combined, please visit our [COVID-19 Resource Center](#). Watch a video highlighting these changes in data on [ANFPtv](#).

Facility Type	Jan. 2021	Oct. 2020
Skilled Nursing/Long-Term Care	48%	21%
Acute Care	54%	23%
Senior Living	52%	21%
Corrections	60%	29%
Schools	46%	14%
Other	42%	20%

**Have any foodservice staff been diagnosed with COVID-19 in the last 30 days? Percentages represent individuals who responded "Yes."**

Each work setting reported a much higher level of COVID-19 infection activity among foodservice staff for the prior 30 days in January 2021 versus October 2020.

## What are your current dining practices?

Most settings have moved from more restricted In-Room Dining Only settings to Socially Distanced or other less restrictive dining styles in January 2021 compared to October 2020. However, dining styles in Skilled Nursing/Long-Term Care appear to have moved to a more restrictive setting over that same time period as COVID-19 cases have increased.

Facility Type	Jan. 2021		Oct. 2020	
	In-Room Dining Only	Socially Distanced Dining	In-Room Dining Only	Socially Distanced Dining
Skilled Nursing/Long-Term Care	66%	27%	60%	31%

Corrections	10%	40%	29%	29%
Schools	10%	64%	8%	60%
Other	24%	55%	22%	52%

## Has your foodservice operation been affected by food item and/or supply shortages during COVID-19?

Food and supply shortages are still a significant issue across all settings, however the situation appears to be improving for most.

Facility Type	Jan. 2021	Oct. 2020	Jan. 2021	Oct. 2020
